

## Press Release

### **Avaada Group Surpasses 17.7 GWp Renewable Portfolio; Over 7.2 GWp Operational and ~ 10.5 GWp Under Construction**

- *With over 7.2 GWp operational and ~ 10.5 GWp under construction, the company aims to accelerate the country's green energy transition.*
- *The company strategically integrates Solar, Wind, Hybrid, FDRE, and Solar-plus-storage projects to provide clean, affordable and round-the-clock power.*

**Mumbai, May 08, 2026:** Avaada Group, a diversified clean energy conglomerate, has surpassed 17.7 GWp in its renewable energy portfolio, including over 7.2 GWp of operational capacity and approximately 10.5 GWp under construction, reflecting its strong execution capabilities and growth momentum. The company added more than 2 GWp capacity during FY 2025-26, further strengthening its position as one of India's leading clean energy players.

Avaada Group integrates solar, wind, solar-wind hybrid, Firm and Dispatchable Renewable Energy (FDRE), and solar-plus-storage solutions to deliver clean, reliable, and round-the-clock power, supporting India's energy transition.

This milestone reinforces Avaada's commitment to supporting India's target of achieving 500 GW of non-fossil fuel capacity.

Commenting on the development, **Mr Vineet Mittal, Chairman, Avaada Group** said, "At a time when global energy markets remain volatile, strengthening energy security through clean energy has become more important than ever. Crossing the 17.7 GWp milestone reflects Avaada's commitment to accelerating this transition. Backed by strong execution capabilities and a robust pipeline, we are well-positioned to scale rapidly across geographies and technologies. Our focus remains on delivering reliable, affordable, and sustainable energy solutions that contribute meaningfully to India's growth and climate ambitions."

Avaada's operational capacity of over 7.2 GWp is estimated to power more than 20 lakh households.

By replacing conventional fossil fuel-based power sources with renewable energy, this capacity contributes to reducing carbon emissions and advancing India's climate goals. The 7.2 GWp operational capacity is expected to avoid more than 10 million tonnes of CO<sub>2</sub> equivalent emissions annually.

## About Avaada Group

*Avaada Group is a diversified clean energy conglomerate driving the energy transition across Renewable Power Generation, Solar PV Manufacturing, Green Hydrogen and Derivatives, Battery Storage, Pumped Hydro Projects, and Green Data Centres. With innovation and sustainability at its core, Avaada is powering the industries of tomorrow with solutions that are Always Clean, Always On.*
