

## **Avaada Group Honoured India's Rural Changemakers at the Millionaire Farmer of India Awards 2025**

**New Delhi/Mumbai, December XX, 2025: Avaada Group**, a diversified clean energy conglomerate, participated in the **Millionaire Farmer of India (MFOI) Awards 2025**, held from 7–9 December at IARI, Pusa, New Delhi. The event celebrated visionary farmers who have built thriving agri-business ventures and brought together progressive farmers, agritech innovators, policymakers, and industry leaders shaping the future of Indian agriculture.

Through its participation, **Avaada Group reinforced its dedication to rural empowerment, sustainable development, and clean energy adoption**—from solar-powered irrigation to strengthening local agricultural ecosystems.

As part of its long-term vision to enhance farm productivity, efficiency, and scale, **Avaada has been solarising farms across Maharashtra** under the **Mukhyamantri Saur Krushi Vahini Yojana 2.0 (MSKVY 2.0)**.

The initiative has ensured **reliable daytime electricity** for thousands of irrigation pumps, eliminating the need for night-time irrigation and enabling farmers to plan their crop cycles more efficiently. Sarpanch and farmers from different districts were recognised at the Awards for their exemplary achievements in agriculture.

**Reflecting on Avaada's participation, Mr. Vineet Mittal, Chairman, Avaada Group**, said: *"Being part of the MFOI Awards 2025 gave us the opportunity to celebrate India's most progressive farmers. At Avaada Group, we have been demonstrating how reliable and clean energy can accelerate rural development while supporting India's green energy mission. From Pune to Yavatmal and Solapur to Nashik, our renewable energy projects are illuminating the lives of farmers across Maharashtra. Each solar and hybrid installation deepens our engagement with rural communities—boosting agricultural productivity, enhancing livelihoods, and empowering lakhs of villagers with a future powered by the sun."*

As part of its expanded commitment to sustainable agriculture in Maharashtra, **Avaada Group has been executing over 1,132 MW of solar power projects** across districts including **Nashik, Pune, Sangli, Yavatmal, Ahmednagar, Solapur, Amravati, Hingoli and Beed**.

These deployments underscore the company's strong support for **MSKVY 2.0** and its role in transforming rural energy access.

In villages such as **Bhenda, Ranjangaon, Najik Chincholi, and Mhasale**, Avaada's clean energy interventions have already helped thousands of farmers reduce diesel dependency, improve irrigation efficiency, and increase agricultural productivity.

### About Avaada Group

Avaada Group is a diversified clean energy conglomerate with businesses spanning renewable power generation, solar PV manufacturing, green hydrogen and derivatives, green data centers, battery storage, and pumped hydro projects.
